WORK EXPERIENCE

Academic Project – CENFOTEC University
Full Stack Developer (2024 – 2025)

- Developed a web system with JWT authentication, roles (SUPER-ADMIN and USER), and protected CRUDs.
- Implemented backend using Spring Boot, Spring Security, JPA/Hibernate, and a MySQL database.

Personal Project – Department Store Management System
Back-End Developer (2025)

- Created a relational database in SQL Server.
- Implemented CRUDs and Java controllers for entities related to inventory, employees, and customers.
- Performed data validation and error handling at the business layer.
